A NEW WAY FOR ANDOVER TOWNSHIP RESIDENTS TO GET  
RECYCLING INFORMATION

New Jersey is the first state to purchase the Recycle Coach application and make it available to municipalities free of charge. The Recycle Coach application provides recycling information to residents in a clear and concise manner. Andover Township should see improved recycling rates as the app attempts to engage residents and help them to learn about the 'Reduce, Re-use and Recycle' principles.

N.J. Department of Environmental Protection Commissioner Bob Martin said: "Recycling is something most of us do every day, and the Recycle Coach app will help us reach even more people to remind them about how they can help the environment....This tool will help all New Jerseyans in achieving our state's recycling goals and demonstrate our ongoing commitment as a national leader in recycling." (Report: [Barnegat Light Tax Payer](#))

The application is actively in use by Long Beach Township, Highland Park, Fanwood, Ridgefield, Parsippany-Troy Hills, Cranbury, and Mine Hill. It will become available statewide as more towns take advantage of this opportunity.

Isn't it better to have recycling information at your fingertips? Now everyone who has a smartphone, tablet or access to the municipality website, can download or connect to the Recycle Coach App for details about garbage, recycling and special waste collections, anytime you want.

The Recycle Coach application offers the following features:

- Easy access to the customized schedule, including holiday or weather related changes, and special collection information through the municipality, as well as events sponsored by the Sussex County MUA.
- Collection requirements and set out times
- A look-up tool for 'What Goes Where' about recyclables and non-accepted waste
- Reminders for the special collections and real-time updates
- Problem report tool that allows notifications and photos to be sent via email

The Recycle Coach application download is available Free through Google Play and the Apple Store. If residents do not have a smartphone or tablet, there will be a link on the Andover Township website and Facebook page.
